

# NANDU NATH

## Software Engineer

Bangalore, Karnataka · +91 8875376718 · nn504136@gmail.com · [Portfolio](#) · [LinkedIn](#) · [GitHub](#)

### PROFESSIONAL SUMMARY

BCA graduate with hands-on experience in software development, data operations, and technical problem-solving. Experienced in building responsive web applications and working with Python, JavaScript, React, SQL, and REST APIs, with a strong focus on software engineering and full-stack development.

### PROFESSIONAL EXPERIENCE

#### Sports Analyst — Hudl India Pvt. Ltd., Bangalore

Jul 2025 — Feb 2026

- Analyzed and tagged high-volume competitive match footage in the 1001 Assist Competitive department, maintaining 99%+ accuracy across data logs and meeting tight SLA turnarounds.
- Enforced strict quality guidelines, identifying tagging anomalies and edge cases in raw game data to prevent downstream reporting errors.
- Partnered with QA leads and shift supervisors to refine tagging protocols, contributing to smoother queue handling and operational consistency.
- Applied structured data validation methods to sports event datasets, strengthening operational and analytical reporting pipelines.

#### Front-End Development Intern — VTech Integrated Solutions, Bangalore

Internship

- Developed responsive, cross-browser web interfaces using HTML5, CSS3, and JavaScript.
- Implemented modular UI components and modern styling patterns with Tailwind CSS.
- Managed source code with Git & GitHub, participating in team code reviews and sprint tasks.

#### Academic Mentor — ODA

6 months

- Mentored students daily, translating complex logical and analytical concepts into structured, step-by-step explanations.
- Monitored learning progress, diagnosed conceptual roadblocks, and designed personalized problem-solving strategies.
- Strengthened communication, stakeholder coordination, and active listening capabilities.

### PROJECTS

#### SportsMatch Analytics — Interactive Match Intelligence Dashboard

JavaScript ES6+ · Tailwind CSS · Chart.js · HTML5 · REST APIs

- Engineered a responsive dashboard visualizing team performance metrics, scoring efficiency, and outcome trends across match events.
- Implemented dynamic filtering by player position, quarter, and opponent team for real-time visual summaries.
- Structured modular, maintainable client-side code using clean architecture and mobile-first design principles.

#### DevTracker — Developer Task & Sprint Management Tool

JavaScript · Python · REST APIs · SQLite / LocalStorage · Git

- Built a task tracking application with category tags, priority queues, and real-time status transitions.
- Integrated input validation and error handling to ensure data integrity across local persistence layers.
- Published clean, structured Git commit histories documenting iterative feature implementations.

### CORE SKILLS

**Programming & Scripting:** Python, JavaScript (ES6+), Core Java, SQL (Basics)

**Web & Full-Stack:** React, HTML5, CSS3, Tailwind CSS, Responsive UI Design, RESTful APIs, DOM Manipulation

**Tools & Environments:** Git, GitHub, VS Code, Chrome DevTools, Linux / Shell Basics

**Quality & Operations:** Data Auditing & Anomaly Detection, Test Scenario Execution, Process Compliance

### EDUCATION

**Bachelor of Computer Applications (BCA)** — Bangalore University · Christ Academy Institute for Advanced Studies · 2022–2025

74.28% (3,454 / 4,650 marks) · CGPA 7.43 / 10 · Coursework: Data Structures, DAA, DBMS, Operating Systems, Computer Networks, Machine Learning, Web Programming

### CERTIFICATIONS

• Software Testing & QA Fundamentals — Certified · Cybersecurity Fundamentals (Kali Linux) — Certified · Infosys Springboard — Industry Readiness & Technical Foundations
